## Product Specification

### **NORFILL HF**

<b>Description</b>	Powder leather filler based on proteins and inorganic materials.
<b>Appearance</b>	Beige powder
<b>Concentration</b>	100%
<b>pH value</b>	n/a
<b>Ionity</b>	n/a
<b>Storage Stability</b>	24 months
<b>Field of Application</b>	Norfill HF is recommended as a retanning agent for chrome and vegetable tanned leathers.
<b>Properties</b>	<ul style="list-style-type: none"><li>- produces a round, tight break</li><li>- good buffing properties</li><li>- deposited into the looser areas of the leather</li><li>- complements other retannages</li><li>- fills the bellies and flanks giving a more uniform handle</li></ul>
<b>Application</b>	Norfill HF is generally added as a dry powder before fatliquoring at a rate of 2-4%. Run for 10-15 minutes then add fatliquor as normal. Norfill HF can be mix with hot water (50-60°C) and finally adding as a slurry to the drum,
<b>Storage Behaviour</b>	Store in a cool, dry place.
