Product Specification

NORWAX FW-10

| | |
|--------------------------|---|
| Description | Combination of soft waxes |
| Appearance | Off white solid |
| Activity | 100% |
| Melting Point | 58°C |
| Storage Stability | 12 months |
| Characteristics | Strong pull-up wax with excellent water repellency |
| Properties | Norwax FW-10 is a combination of specially selected soft waxes that produces a strong dark pull-up with good filling properties. The darkening effect and penetration can be modified by the addition of Finishing oil FT while still maintaining water repellency. The pull-up characteristics are long lasting and shouldn't disappear during the shoe manufacturing process. |
| Application | By heated rollercoater machine. The amount to apply is normally two coats between 6 to 8 grms square foot. After application pile leather overnight to equalise. Finally plate or mill as desired. |
| Storage Behaviour | Product is not sensitive to cold |
| Product code | 3-6655 |
