Product Specification

NORWAX HFT

Description	Combination of soft waxes and oils
Appearance	Amber paste
Activity	100%
Melting Point	58°C
Storage Stability	12 months
Characteristics	Soft light pull-up with a waxy drag feel
Properties	<p>Norwax HFT has been developed to minimise the problem of poor sole adhesion during shoe manufacturing . A number of low quality pull-up wax products can cause reduced sole adhesion - Norwax HFT will minimise this problem. These figures have been achieved without any loss of a pleasant oily waxy touch.</p> <p>Footwear produced from Norwax HFT is also proven to pass the Gortex water vapour permeability test. To achieve this pass the product should be applied at a maximum of 15 grms per sq ft , this level should ensure a consistent high figure.</p> <p>The amount to apply is between 12 to 15 grms per square foot. Apply in two coats, leave overnight and plate if desired for maximum effect.</p>
Application	Heated roller coater machine, heat wax before application.
Storage Behaviour	Product is not sensitive to cold
Product code	5-7329
