Product Specification

NORWAX VTC

Description	Finishing wax for English style bridle and saddle leathers
Appearance	Cream, solid
Concentration	100%
pH value	n/a
Ionity	n/a
Storage Stability	12 months
Field of Application	Final wax treatment for vegetable tanned bridle and saddle leathers. Product produces a traditional English wax finish.
Properties	<ul style="list-style-type: none">- bright, glass like waxy surface- pleasing white waxy bloom- good water spot resistance- improves finish fastness- natural aniline look
Application	Apply by hand using cloth or swab. The amount applied depends on the previous finish system and softness of the wax. Norsol bridle seal IFN is a proven base finishing system for this type of leather. For an even application of Norwax VTC apply at room temperature of 18-20C. During winter months temperature adjustments may be required. Hang leather in a heated room overnight to allow partial penetration of wax into the leather. Next day brush off excess wax and slick out using a flint slicker to a high shine.
Storage Behaviour	Store preferably between 5-30C
Product code	2-3709
