

DATA SHEET

October 2006

Product Specification

NORSLIP GS

Description	Powder slip agent based on inorganic and polymer compounds
Appearance	Beige powder
Concentration	100%
pH value	6.5 to 8.0
Ionity	n/a
Storage Stability	36 months
Field of Application	Prevents knotting and tearing during wet processing
Properties	<ul style="list-style-type: none">- improves leather uniformity during wet processing- is totally inert against hides and pelts- enables short floats to be used- complements other retannages- reduces knotting and tearing
Application	Norslip GS is usually added undissolved to the drum at a rate of 0.25 to 0.4 in wet processing operations where knotting and tearing are a problem. After each bath change add more Norslip GS to maintain slipping effect.
Storage Behaviour	Store in a cool, dry place
